

BSYM 2008: LIST OF ACCEPTED PAPERS

Paper Number	Paper Title
1569116195	Probabilistic Orientation Field Estimation for Fingerprint Enhancement and Verification
1569116503	Hierarchically linked extended features in fingerprints
1569121113	Scars, Marks and Tattoos (SMT): Soft Biometric for suspect and victim identification
1569122187	Biometrics at Distances Based on Laser Doppler Vibrometry with a Robust Feature Selection Method
1569122975	Three factor scheme for biometric-based cryptographic key regeneration using iris
1569123391	Bio-Cryptographic Protocols With Bipartite Biotokens
1569123699	A Methodology for separating sheep from goats for controlled enrollment and multimodal fusion
1569123861	Lip contours detection and tracking with multi features
1569124033	Biometric Template Update Using The Graph Mincut Algorithm : A Case Study In Face Verification
1569124047	A Personal Entropy Measure for Online Signatures: A Step Towards Relative Quality of Databases
1569124115	Ear Segmentation in Color Facial Images Using Mathematical Morphology
1569124117	A Multiband approach to human identity verification based on phonocardiogram signal analysis
1569124133	Accurate Segmentation of Digitized Dental X-Ray Records
1569124221	Practical Considerations for Secure Minutiae Based Templates
